

# Model DA2D Wireless Closed Door Alert Transmitter & Receiver

The Mr. Chime,® Inc. Model DA2D is a battery operated entry alert chime, magnetically activated sensor, that transmits a wireless signal to a remote receiver over 200' away, that emits a choice of two different volume controlled, pleasant electronic door chime alerting sounds.

The DA2D door chime activates only when the door is opened and does not activated when the door is closed or left open. Ideal door chime for doors that are always closed i.e. (Doctor, Lawyer, Dentist, Child alert, Wandering alert for the elderly, food services or etc.)

Specially designed for simple do-it-yourself installation on all types of doors, includes velcro fasteners for quick secure mounting without drilling or the use of screws. The newly developed non-directional antenna greatly reduces 'dead spots' to make installation easier and increase reliability for all entry alert chime applications. Includes a plug in cable to connect an "optional" after hour door bell button (not included) for the business that desires an daytime door announcer and a night time door bell all in one system.

Mr. Chime,® Inc. Patented micro technology provides "maximum" performance with "minimum" size & price.

## FEATURES:

- ▲ The DA2D is battery operated and is activated magnetically. When activated it provides a pleasant electronic chime sound, only one time when the door is opened and does not continue while the door is left open and does not sound when the door is closed.
- ▲ The door sensor (Model DA2T pictured next to a dime for size reference) transmits a wireless signal to a remote receiver over 200 feet away, that emits a choice of two different volume controlled, pleasant electronic sounds.
- ▲ The Model DA2T (Sensor/transmitter), uses (1) 12v battery A-23 (included) and has a Patented low battery consumption design making it the best available.
- ▲ The DA2D (receiver/sounder) has a (12 volt output) for many plug-in accessories, with 3 selectable output timers to regulate the time duration of the accessory being used.
- ▲ The DA2D has personal codes to eliminate signals by other units in the close proximity.
- ▲ The DA2D is available with an optional customer counter for tracking customer flow into stores or fitting rooms (**Model DARC**)
- ▲ The DA2D is wireless and does not require any electrical wiring.
- ▲ Optional third alerting sound is available (**MODEL PA1**) for freight delivery alerting, using our wireless door bell (**MODEL DA5T**) in conjunction with this basic system.
